WELCOME TO VIRGINIA'S ROBUST AND DIVERSE INDUSTRY OF AGRICULTURE

Welcome to the Virginia Shippers Directory, your personalized road map that leads you directly to sources for Virginia Grown fruits, vegetables, peanuts and Christmas trees.

I believe we offer three compelling reasons to buy Virginia produce: location, quality and diversity. Because Virginia is located within 750 miles of 60 percent of the U.S. population, we are able to get fresh product to consumers quickly to preserve freshness, taste and optimum nutritional value. Our farmers produce the highest quality products and offer a tremendous variety – including peanuts and potatoes in the Tidewater and Eastern Shore area; fresh-market vegetables from the Shore and Piedmont; pumpkins, Christmas trees and cold-weather vegetables and greens from the southwest; and apples and other tree fruits in the north and the mountainous central region.

Inside this new Directory you will find the names and contact information of Virginia's major growers and shippers. The produce is listed alphabetically and includes a detailed description of features, benefits, varieties, pack size, grade and trends, as well as a year-round produce availability chart.

We also have provided the contact information for our Regional Marketing Development Managers. These men and women comprise our team of Virginia agricultural experts who are eager to serve you in domestic and international markets. Many of our produce growers and shippers are able to meet import requirements for Canada, the Caribbean, Mexico and other important trading partners.

Agriculture is Virginia's number one industry, contributing \$52 billion to the state's economy each year and providing 311,000 jobs. Our prime East Coast location, our growers' commitment to quality and our diverse portfolio of products are evident in this book, and I encourage you to think of Virginia first for many of your produce needs.

Sincerely,

Sandra J. Adams, Commissioner

-Equal Opportunity Employer-

Virginia Grown Fresh From the Farm. Fresh To You.

The Virginia Grown program was developed to assist in marketing fresh Virginia fruits, vegetables and Christmas trees. Used by wholesalers and retailers, growers and shippers, grocery stores and farmers' markets, the Virginia Grown produce logo identifies locally grown products. You can now access the Virginia Grown logos by visiting VirginiaGrown.com and clicking on Media Center featured on the left hand navigation bar.

Raising consumer awareness of the variety, abundance and ready availability of Virginia Grown produce has a positive impact on the industry. Consumers equate Virginia Grown with freshness and quality. And, given a choice, many consumers prefer to buy locally grown products.

For more information on the Virginia Grown marketing program, contact the Office of Sales and Market Development or the Regional Market Development Manager in your area. See listings on page 4 and 5.

Apples

Features and Benefits:

Virginia has an apple for every reason and every season. Twelve major apple varieties are grown in Virginia, and each variety has its own unique characteristics.

Virginia's Red and Golden Delicious varieties are the all-time favorites. In addition, our Red Delicious apples are extremely sweet and juicy. Virginia's York, Fuji, Winesap, Rome, Stayman, Gala, Ginger Gold, Granny Smith and Pink Lady apples are delicious as a snack or for apple pies, cakes, fried apples, syrup, cider, sauce and apple butter.

Because of their proximity to major markets, Virginia apples are more economical to transport. Wide variety and nearly year-round availability make Virginia one of the top apple producing states in the nation.

Major Varieties: Red Delicious, Golden Delicious, York, Rome, Stayman, Winesap, Granny Smith,

Jonathan, Gala, Ginger Gold, Fuji and Pink Lady

Pack Size: Box (42 pounds), Tray Pack, Bulk, Bins, and Assorted Consumer Bags

Grade: Tray Pack: U.S. Extra Fancy, Combination U.S. Extra and U.S. Fancy, and U.S. Fancy. Bags: U.S. Extra Fancy, Combination U.S. Extra and U.S. Fancy, and U.S. Fancy, 2½" and up packed in assorted sizes.

Trends: On the average, apple production in Virginia is approximately 350 million pounds a year. Virginia growers continue to plant new apple trees and eliminate old orchards that have become non-productive. The use of dwarf, semi-dwarf and spur type trees continues to climb. These rootstocks comprise more than 70 percent of all trees. Virginia continues to increase its plantings of Fuji, Gala and Pink Lady. Virginia growers are con-

Asian Pears

Features and Benefits:

Virginia's Asian pears are extra sweet and juicy. Their crisp texture is a result of the rich clay soils and hot days along with plenty of water. Asian pears should be picked ready-to-eat and should keep one or more months with refrigeration. Size, shape and skin coloring vary with variety and sizes range from 5-ounce fruits to jumbos weighing one pound and more.

Many Asian pears are being produced under "Virginia certified organic" labeling. These Asian pears command a premium retail

price for this quality as consumers are buying more organic fruits and vegetables.

Varieties: August to October: Shinsui, Hosui, Kosui, New Century, 20th Century, Autumn Sweet, Arriang, Shinko, Shin Li

Pack Size: 10 lb. one layer tray boxes with counts from 12 to 25

Grade: U.S. No.1

Trends: Although Asian pear orchards are young, a moderate increase in production is expected each year. Additional Asian pear

Berries

Features and Benefits:

Although Virginia's berry industry is relatively small, several shippers have supplies available during the summer harvest season.

Types: Berries

Pack Size: Blackberries: 12/6oz or 12/½ pint clamshell flats

Grade: Blackberries: U.S. No. 1; U.S. No. 2

Trends: Relatively light production throughout the state is not expected to change dramatically in the foreseeable future.

Key to Abbreviations:

Broccoli

Features and Benefits:

Broccoli has become a major crop for Virginia with most of the commercial acreage located in Virginia's Northern Neck and in the mountains of Southwest Virginia. The moderate influences of the Chesapeake Bay as well as the cool nights and warm days in the mountains of Southwest Virginia provide ideal conditions for growing excellent broccoli. This, coupled with good varietal selection and modern production practices, gives producers the tools to grow broccoli that tops the stan-

dards. Post harvest handling is first class as all product is injected and topped with slurry ice to remove field heat and enhance shelf life.

Pack Size: RPCS, Cartons and Crates – Bunched and Crowns

Grade: U.S. Fancy and U.S. No 1
Varieties: - Various Varieties including Windsor, Green Magic, Imperial, Gypsy

Trends: Broccoli acreage has trended up over the last several years.

Availability

	MAY	JUNE	JULY	AUG	SEPT	OCT	NOV	DEC
BROCCOLI	—				—			

This trend will probably continue to increase as customers like the local flavor and proximity to market of Virginia broccoli.

Cabbage

Features and Benefits:

Most Virginia cabbage is grown in the mountains of Southwest Virginia, where the cool nights and warm days are ideal for producing some of the best cabbage available anywhere. The moderating influences of the Chesapeake Bay and the Atlantic Ocean also create ideal growing conditions for cabbage on the Eastern Shore of Virginia.

Virginia cabbage is irrigated by modern systems, and it is carefully packed to ensure that there is no decay or mechanical scarring. Lower wrapper leaves are trimmed

away, leaving an extremely marketable product. Proper ventilation during transportation ensures that the customer will receive cabbage of the highest quality. The sweet taste of Virginia's cabbage is preferred for slaws and salads. It is an excellent source of roughage, vitamin C, thiamine and iron. Pre-cooling is available through some shippers.

Varieties: Eastern: Blue Bayou, Blue Vantage, Bravo; Western: Rio Verde, Green Boy, Market Prize, Ramada, Bronco, Atlantis; Red: Small quantity available.

Availability

	MAY	JUNE	JULY	AUG	SEPT	OCT	NOV	DEC
CABBAGE								

Pack Size: 1¼ Bu. crates, 1.8 Bu. carton, 50 lb. mesh sacks
Grade: U.S. No. 1, U.S. No. 1 Green, U.S. No. 1 New Red

Trends: Cabbage acreage declined in the early '90s but has stabilized over the past several years and is expected to remain at current levels.

Cantaloupes

Features and Benefits:

Virginia growers produce mostly the Athena variety which was developed for its sweetness and good shelf life. These melons move into markets throughout the East Coast and sometimes into Canada. Virginia cantaloupes are well-netted, a sign of maturity. Growers are particularly careful to ship mature but not overly-ripe melons.

Rich in vitamins A and C, Virginia cantaloupes are a summer favorite that have a terrific flavor and are good for you, too.

Varieties: Athena, All Starr, Odyssey, Seigersizi, Vienna, other various hybrids

Pack Size: Bulk bins, specialty packs

Grade: U.S. No. 1

Trends: Production is expected to remain constant in Virginia. Growers are utilizing plasticulture practices with trickle irrigation and rye strips to cut down on wind damage. The use of plastic and drip irrigation allows the grower to precisely deliver to the plants the

Christmas Trees

Features and Benefits:

Virginia Christmas tree growers offer a wide selection of trees in a full range of sizes. Because of their proximity to East Coast markets, Virginia Christmas trees are harvested at the beginning and during the Christmas season so consumers can be assured of a fresh and healthy tree. Enjoy the best Virginia has to offer.

Varieties: Austrian Pine, Blue Spruce, Concolor Fir, Douglas Fir, Fraser Fir, Hemlock, Norway Spruce, Red Pine, Scotch Pine, Virginia Pine,

White Pine and White Spruce.

Trends: Christmas tree farming is a major agricultural industry in Virginia. Each year, 1.5 million Christmas tree seedlings are replanted on 25,000 acres of tree farms. The Christmas tree industry is now estimated to generate 14 million dollars a year in annual sales.

Virginia Christmas Tree Growers Association

(VCTGA) is an association of professional

Christmas tree growers interested in the

expansion of our farming industry by

growing and marketing quality trees.

Cucumbers

Features and Benefits:

Large commercial growers on the Eastern Shore and Northern Neck keep produce markets in the eastern United States supplied with cucumbers throughout the summer months and well into the fall. Virginia cucumbers are characteristically tender, firm, straight and well-known for their outstanding green color.

Virginia growers produce cucumbers from the more productive hybrid varieties. Growers rely on modern scientific technology

such as leaf tissue testing to monitor crop growth in order to bring consumers the best product available.

Varieties: Dasher, Greensleeves, Speedway, Stonewall, Turbo, Indy

Pack Size: 1½ Waxed Bushel Cartons; Waxed Cartons - 24 pack

Grade: U.S. No. 1 Small-Large; Industry Grades - Super Select, Select, Plain

Trends: Cucumber acreage has been relatively stable for the past

Greens and Spinach

Features and Benefits:

Produce buyers have come to rely on the availability of Virginia southern greens to add variety to their produce departments. The wide variety of leafy greens gives customers many choices for their salads and side dishes. Virginia greens are plentiful, tender, crisp and flavorful in early spring and late fall.

Spinach is Virginia's major leafy green. In fact, Virginia is one of the major suppliers of spinach for the northeastern United States and eastern Canada.

Virginia spinach is harvested and packed with state-of-the-art equipment, layering spinach leaves between layers of ice to preserve

its freshness during transport. It is thoroughly cleaned and washed before packing.

Our other greens are also popular throughout the East Coast. Always, the emphasis is on freshness and top quality.

Types: Spinach, collards, kale, turnip greens, mustard greens, rabe, spring mix

Pack Size: Bushel baskets, crates and cartons

Grade: U.S. No. 1

Trends: Acreage of southern greens, including spinach, is approximately 1,000 acres in Virginia and is expected to remain

Lettuce

Features and Benefits:

Most Virginia lettuce is grown in greenhouses, either in a soil mixture or hydroponically. With indoor production, the grower can control the entire production process, monitoring the temperature, water rates and nutrient usage. Growers find much less insect pressure with indoor production. Greenhouse grown lettuce is produced year-round with consistent quality and volumes. Lettuce is a key component in salads and a

staple among many households.

Varieties: Green and red leaf, green and red romaine, red and green oak lettuce, red and green Butterhead (includes Boston and Bibb types)

Trends: Virginia has seen a significant increase in lettuce production over the last five years due to consumer demand.

Nectarines

Features and Benefits:

Grown in the mountains of Virginia, nectarines thrive in Virginia's climate of warm days and cool nights. The nectarines are irrigated by modern pulse irrigation systems and are picked frequently for optimum maturity and taste. In addition, Virginia nectarines can be hydro-cooled, a system of fast, cold water cooling to preserve freshness and taste.

One of the biggest selling points of Virginia nectarines is that they are so close to major markets

they can be delivered overnight. All of these benefits add up to providing the buyer and consumer with one of the sweetest nectarines available.

Varieties: Summer Beaut, Sun Glow, Red Gold, Fantasia

Peaches

Features and Benefits:

Virginia's peaches have been called the queen of fruits. Big, juicy and sweet, they are Virginia's number one summer tree fruit. Virginia's wide variety of peaches assures a long season and gives retailers, wholesalers and consumers a bushel of choices.

Virginia peaches can be hydro-cooled, a system of quick cooling with water that preserves freshness and extends shelf life.

Close to major markets, Virginia peaches can be shipped in a more mature state, giving consumers the taste of tree-ripened, "just picked" sweetness.

Varieties: Red Haven, Loring, Crest Haven, Encore, Blakes, White Lady

Pack Size: 10 lb. and 25 lb. boxes
Grade: U.S. Fancy, U.S. Extra No. 1, U.S. No.1

Peanuts

Features and Benefits:

Nothing can beat the size and taste of a true Virginia peanut. Virginia farmers have been growing peanuts since the early 1840s. Our world-renowned peanuts are grown in Southeastern Virginia's sandy soil where the climate is ideal for producing large peanuts. Because of their large kernels, Virginia peanuts have acquired the reputation of being the Cadillac of peanuts. Our peanuts are valued by consumers not only for their large size, but also for their outstanding flavor and pleasing crunchy texture. Virginia peanuts

are distributed throughout the United States and exported around the world.

Peanuts are an excellent source of protein and are cholesterol-free.

Varieties: Bailey, Champs, Gregory, Sugg, Sullivan, Wynne

Pack Size: 25 lb., 50 lb., 100 lb.;
Bulk: In-shell and shelled

Grade: U.S. Jumbo Handpicked, U.S. Fancy Handpicked

Peppers

Features and Benefits:

Virginia peppers are good mixers. Even before they find their way into tossed salads and gourmet dishes, green, red, and yellow peppers are often used as mixers with other vegetables shipped from Virginia's vegetable-producing areas. In addition to the bell types, Virginia growers produce such favorites as jalapeno and Cubanelle types.

Virginia's bell-type peppers are characteristically large, firm and well-shaped with thick walls. They generally are plentiful in the growing regions throughout Virginia.

Varieties: Bell type: Bell Captain,

Camelot, Camelot XR3; jalapeno Type: Grande, Tula; Cubanelle Type: Key Largo

Pack Size: Bell Type: 1½ bushel waxed cartons; jalapeno type: ½ bushel crates and cartons; Cubanelle type: 1½ bushel waxed cartons

Grade: U.S. No. 1

Trends: Virginia's production of bell-type peppers will fluctuate slightly from season to season depending on market conditions. For the most part, peppers are grown on plastic with drip

Potatoes

Features and Benefits:

The potato crop makes up a major portion of Virginia's cornucopia of vegetable production. The crop enjoys wide distribution throughout the East Coast from Eastern Canada to the Florida Keys and as far west as the Mississippi. Virginia has long been noted for its round white potato production, but in the last few years, growers have increased acreage of round reds, Yukons and russets. Each of these types is available in straight loads or mixers.

More than 70 percent of Virginia's potatoes are grown on the Eastern Shore, where cool ocean breezes, coupled with modern irrigation systems, provide a

controlled moisture supply that potatoes thrive on. Growers continue to invest in the most modern packing and cooling facilities to further enhance the quality of Virginia potatoes.

Virginia's large or chef potato is widely distributed and much sought. Virginia producers also supply top quality potatoes for potato chip processing. Let us put the quality of Virginia potatoes to work for you.

Varieties: Fresh: Superior, Dark Red Norland, Yukon Gold, Norkotah; Processing: Atlantic, Snowden, various others

Pack Size: 5 lbs. (baled), 10 lbs.

Availability

	MAY	JUNE	JULY	AUG	SEPT	OCT	NOV	DEC
POTATOES		■	■	■				

(loose and baled), 20 lbs., 50 lbs.; bulk (washed and unwashed)

Grade: U.S. No. 1; U.S. No. 1, Size A; U.S. No. 1, Size B; Chefs

Trends: Potato acreage began a downward trend in the mid-eighties. However, acreage has now stabilized and growers and shippers regularly send out 80 to 100 loads daily during late June and early July.

Pumpkins

Features and Benefits:

Virginia Pumpkins are used for the traditional Halloween and fall decorative events that usually extend past Thanksgiving. They come in a wide range of sizes and a variety of fall orange shades from bright to dark. There are decorative miniatures, pie pumpkins, traditional round, ribbed jack-o'-lantern types and very large dark orange pumpkins. The mix includes white colored pumpkins, warty pumpkins, multi-colored minis and an array of gourds. The proximity of Virginia pumpkin growers to major markets lowers

transportation costs. Virginia pumpkins are hardy and hold up well.

Varieties: Aspen, Baby Pam, Howden, Prizewinner, ProGold 510/520, Stable, Magic Lantern, Aladdin, Gladiator, Gold Medal, Cotton Candy, Hybrid Pam, Cannonball, Mystic Plus.

Pack Size: Bin (20 lb. average)

Grade: U.S. No. 1; U.S. No. 2

Trends: Pumpkin production varies from year to year in Virginia, usually based on weather conditions, but

Availability

	MAY	JUNE	JULY	AUG	SEPT	OCT	NOV	DEC
PUMPKINS								

is showing a slight upward trend. Pumpkin production in Virginia has grown to more than 2,500 acres.

Squash

Features and Benefits:

A combination of rich soil and mild climate keeps Virginia's yellow, straight neck and zucchini squash tender and firm. Virginia zucchini has the best color and shape of any on the East Coast. These versatile vegetables have a long five-month harvest season and are produced close to major markets for quick delivery. In addition to yellow and zucchini squash, Virginia growers produce acorn, butternut, spaghetti and

other popular types.

Varieties: Various varieties of both yellow and green

Pack Size: Half Bu. Box

Grade: U.S. No. 1, U.S. No. 2

Trends: Squash acreage has remained stable over the past five years in Virginia and is expected to remain so.

Sweet Corn

Features and Benefits:

Virginians have been growing corn since the first settlers arrived in the new world. Native Americans were the first to share their secrets about growing corn, and ever since then, Virginians have been improving on it.

Today, Virginia sweet corn is grown from special hybrids developed for their sweetness. The sweetness is sealed in by hydro-cooling, a system of water cooling that quickly brings down the corn's

temperature, preventing the conversion of the corn's sugar to starch.

Virginia's yellow varieties of sweet corn are the first ready for harvest in mid-summer, followed by several varieties of white and bi-color corn that enjoy a special reputation for sweetness.

Varieties: Several hybrid varieties of white corn and bi-color.

Pack Size: 4½ to 5 doz. crates

Availability

	MAY	JUNE	JULY	AUG	SEPT	OCT	NOV	DEC
SWEET CORN			—	—				

Grade: U.S. Fancy, U.S. No. 1

Trends: Fresh market sweet corn acreage will remain fairly steady over the next few years.

Sweet Potatoes

Features and Benefits:

Sweet potatoes are one of the most nutritious foods available to today's consumer. They are especially high in vitamin A, providing more than twice the recommended daily adult requirement in one medium sweet potato. Like other Virginia vegetables, Virginia sweet potatoes are grown close to the market where they can be delivered overnight.

Varieties: Beauregard, Hernandez, Hayman

Pack Size: 40 lb cartons

Grade: U.S. No. 1

Trends: Virginia's sweet potato acreage declined dramatically in the 70s and 80s. However, production has now stabilized and is expected to remain at the present level for the foreseeable future.

Tomatoes

Features and Benefits:

The mature green tomato is Virginia's number one vegetable cash crop for several reasons. For one, Virginia is a major production area for tomatoes, making supplies readily available throughout the eastern United States. Because of Virginia's access and proximity to major markets, transportation costs of mature green tomatoes are lower and tomatoes arrive sooner and fresher.

Sandy, loamy soil and moderate climactic conditions in Virginia's tomato-growing regions provide just the right combination for a high-quality tomato. Most mature green tomatoes are ripened under controlled conditions using

natural ethylene gas. This gives buyers the exact level of ripeness they desire, and enables Virginia growers to ship mature green tomatoes throughout the eastern United States and Canada.

In addition to the mature green, growers are producing mouthwatering vine ripers. The popularity of grape tomatoes is reflected in the increased acreage of this delicious addition to the tomato family. Cherry, plum, and greenhouse/hydroponic tomatoes are also available in commercial quantities.

Varieties: Solar Set, Sun Pride, Mountain Spring, Mountain Pride, Sunbrite

Availability

	MAY	JUNE	JULY	AUG	SEPT	OCT	NOV	DEC
TOMATOES			██████████					

Pack Size: 25 lbs. (extra large, large, medium and small)

Grade: U.S. Combination (or better), U.S. No. 2, U.S. No. 3

Trends: Mature green tomato acreage has stabilized in recent years but an increasing trend in acreage of vine ripe production has developed.

Watermelons

Features and Benefits:

Virginia watermelons are known for their flavor, sweetness and bright red flesh. Our spring and summer weather conditions generally provide an excellent atmosphere for a great melon. Our supply peaks as the crop from the south declines.

Virginia watermelons come in a variety of sizes, with most averaging 20-26 pounds.

Watermelon buyers benefit

from Virginia's proximity to major markets, thus resulting in fresher melons with lower transportation costs. Melons are available from July through mid September.

Varieties: Seeded and seedless

Pack Size: Bins, bulk, cartons

Grade: U.S. No. 1

Availability

	MAY	JUNE	JULY	AUG	SEPT	OCT	NOV	DEC
