

The Virginia Agricultural Council (VAC) supports agricultural research, education, and services. Research includes uses for agricultural products, to develop new markets for such products, and to promote more efficient and economical methods of agricultural production. An expanded program of agricultural research is essential to these objectives and will be beneficial to the state. To submit a pre-proposal or for more information see the attached instructions. Examples of previously funded projects may be found in previous annual reports at: <http://www.vdacs.virginia.gov/boards-virginia-agricultural-council.shtml>
