

New!

EECVI

Extended Equine Certificate of Veterinary Inspection

The **Extended Equine Certificate of Veterinary Inspection (EECVI)** will replace the current Equine Event Permit. The Equine Event Permit will be issued until June 30, 2019 and will be honored until it expires.

The new **EECVI** is only currently available online through GlobalVetLink. The **EECVI** extends the original timeframe of a CVI from 30 days to six (6) months from the CVI inspection date or the Coggins test expiration date, whichever comes first. Prior to each movement, the owner must log in to the database and obtain a Health Declaration and Movement Permit (HDMP). In order to remain a valid document, the Coggins test form and the HDMP must be kept together (official digital copies are acceptable). Listed below are the requirements for an **EECVI**.

Veterinarian Checklist

As a veterinarian, you will need to verify certain items, educate the owner, and enter information electronically.

Verify:

- ✓ Equine health status at the time of your visit.
- ✓ Owner name is the exact name in which the Health Declaration & Movement Permit (HDMP) will be issued.
- ✓ Origin address where the equine is stabled.
- ✓ Official identification; be sure the owner is aware that not all states accept all forms of official identification!
- ✓ Negative EIA test. If the EIA test is not valid for at least six more months, a new EIA test can be drawn, or the system will shorten the expiration date of the EECVI to the date when the EIA test expires.

Educate the owner/agent on:

- Keep proof of official identification at all times when not in the state of origin
- Log into an approved electronic system and get a Health Declaration & Movement Permit (HDMP) PRIOR to each interstate movement and have paper or digital copy on hand at all times.
- Review temperature taking and general signs of equine sickness that must be evaluated prior to each movement. This includes evaluation of mucous membranes, submandibular lymph nodes, signs of diarrhea, depression, inappetence, nasal and ocular discharge, and abnormal breathing.
- If the horse has shown signs of sickness within 7 days of movement, a veterinarian must clear the horse prior to interstate movement. If you have concerns about owner/agent compliance, do not issue an EECVI.

Access the EECVI web portal:

1. Log in and enter the following:
 - Owner/agent info (name, email, phone number, physical address and mailing address if different)
 - Horse information (age, breed, sex, color)
 - Official ID(s)
2. Enter the EIA test Information (accession number, lab information, and blood draw date)
 - The EECVI is valid for six months unless the EIA test "expires" sooner. If so, the system will calculate the shorter expiration date and notify you.
3. Attest to the health of the horse at the time of your exam.
